50
YEARS
Bathroom

Jörg Loew
CEO

OUR NEW ANNIVERSARY YEAR PRODUCTS

burghbad will be celebrating an impressive anniversary this year: our furniture will have contributed to some fundamental changes in bathroom design for the past 50 years. Over the course of these, we have launched many innovative solutions and designs that have always strictly focused on getting away from the idea of „a room for the bath“ to the concept of „a bath in the room“.

Our anniversary year is no exception; once again we have some new products in store for you. For example, with Yso, we have developed a range that combines exceptional versatility with a contemporary design language. Eqio, on the other hand, is a range that offers excellent value for money yet still benefits from burghbad’s first class design quality. We have also developed our ranges Bel and Sinea further – and made them even more beautiful and ingenious.

I am delighted to be able to present these exceptional new products to you in our anniversary year. However, for now, I simply hope that you will enjoy discovering what is new whilst you continue to appreciate all of the advantages traditionally offered by burghbad.

Substance is the mind and soul of good design. We hope that you have many inspiring moments as you „plunge into“ our new products for 2015.

MULTIFACETED VERSATILITY.

The outlook is bright for all those who appreciate graceful and aesthetic design. Yso can do anything: square and round, lacquered and veneered, full of contrasts and understated. The proof: two vanity unit versions with only 12 mm thick ceramic tops feature impressively slim edges. Plus numerous design and finish choices for storage units, mirrored cabinets, mirrors and shelves.

Unusual details have more than just a practical purpose; the all-round chrome rail, for instance, does more than just offer a convenient place to hang up your towels. They are also design highlights. Each and every one of these details will make your day brighter.

First impressions never change? Not necessarily: discover Yso's many different faces on the following pages.

SWEEPING START TO THE DAY

The curved shape of this vanity unit with an exquisite ceramic top and basin extends a polite invitation. Especially if the individually customisable drawer interior also follows suit.

VERSATILITY MEETS COLOUR

Matt, veneered or high gloss finishes in fresh colours: all of these can also be combined with each other two-tone style.

GIVING ROOMS MORE SPACE

The new Yso tall storage unit is a true all-rounder. Not only does it provide ample space for tidying away toiletries etc., it can also be a useful room divider to hide unsightly necessities – although in itself, it is nothing to be ashamed of: thanks to the full-length mirrored frontage, this storage unit is a looker. The intelligent temperature sensitive lighting controls integrated into the mirrored cabinet bathe the room in a warm glow or in cold light, whichever suits your purpose.

Inimitably Yso: the framing chromed metal trims. On the vanity units, they either run along the edge of the top or in between the unit doors as integrated cabinet handles

PLAY WITH DIFFERENT FINISHES

Sophisticated walnut finish at the front, elegant high gloss at the sides. Yso positively encourages finish mixing and matching – although the choice of finishes is so extensive that the decision may well be difficult to make.

Simply stunning, how the chromed metal trim seamlessly melts into the design in an unobtrusive yet perfect and well-balanced way.

A place for everything

Thanks to its asymmetric shape, this ceramic top vanity unit is a truly miraculous space saver. Above it the perfect illustration of how the shelves also mirror the design's characteristic chrome trims and towel rails.

Yso's half height cabinets also feature the style-defining chrome elements. A convenient handle – and generously-sized interiors.

Clever drawers: pull Yso's drawers out only once to use double the storage space.

BRILLIANT PROSPECTS

What makes Yso so brilliant is the versatility of the range. Not least also apparent in the wide choice of finishes. Yso offers everything you might want, from dark wood to high gloss brilliance.

EVEN MORE ROOM FOR IDEAS.

Bel stands for creative bathrooms design. And because, as everyone knows, the sky's the limit when it comes to using your imagination, we have developed the range a bit further and added visual highlights, ingenious solutions and useful accessories.

Look forward to many fresh ideas that make a wonderfully flexible bathroom range even more appealing in a particularly charming way.

Plain and simple? Certainly not! Bel has many surprises in store; for example a cabinet with mirrors on all sides.

BOX CLEVER

The best solutions are surprisingly simple. Bel features these in the form of cleverly divided interior fittings, non-slip drawer liners and practical integrated lighting.

New: the elegant integrated thermofoil handle is actually much too pretty to hide with a towel.

Even though Bel does anything but inspire black and white thinking, the light mother-of-pearl shimmer of the new high gloss white opal finish is simply striking.

IT JUST FITS

A prime example of Bel's modularity. The range offers the right solution for any situation, here in the form of a ceramic top double basin vanity unit, a mirrored cabinet and a generously-sized tall cabinet.

TIME TO SHINE

They way the elegant ceramic top of this vanity unit with double-size basin and the new high gloss white opal finish try to outshine each other is a joy to behold.

Just a light that you can switch on and off? Boring. Depending on your mood and the time of day, the integrated LED lighting of this mirrored cabinet can be dimmed from warm glow to cold and practical.

**BIG COVER-UP**

Surprisingly ingenious, this cosmetics storage unit. Not only does it present all of the respective accessories like a silent personal valet, it also holds the mirror for you.

FOR THOSE WHO WANT IT ALL.

Eqio combines burghad design with high quality materials, extensive versatility, clever details and above all: outstanding value for money.

We have made what sounds almost impossible possible by designing a range that is full of ingenious ideas.

For example vanity units with cast mineral, ceramic or glass tops and basins. Or plenty of storage space, smart details and a choice of finishes.

What are you waiting for? Ready, steady, furnish – Eqio is looking forward to being of service!

Vanity unit with ceramic basin, white high gloss finish: 63cm; mirror with lighting, 65cm; half height cabinet with door, 35cm; 2x 35cm shelves

GET THE MOST OUT OF IT

The Eqio range is not what it seems at first glance, even in the smallest of spaces. It takes a second look to fully appreciate the impact of the ceramic top vanity unit or the high gloss finish of the cabinets.

Just when you thought that nothing could beat the glass inset basin, a look inside the drawer below reveals even more stunning features. Well-organised!

SEAMLESSNESS

The shape of the vanity unit shows off the high quality materials to their best advantage. In consequence, the seamlessness between the top and the unit looks absolutely effortless – glass does the trick.

Vanity unit with glass double basins: 122cm; vanity unit with 2 drawers and 2 pull-out storage drawers: 120 cm; mirror with lighting and shelf: 120 cm.

Half height cabinet: 35 cm; 3 shelves: 35 cm, right picture: 2 half height cabinets: 35 cm, 2 shelves: 35 cm.

RATHER SPACIOUS

Generously-proportioned and at your service: this ceramic topped vanity unit is the focus of this well-designed bathroom. Eqio gives you the freedom to choose whatever you need.

Vanity unit with double sized cast mineral basin: 122cm; vanity unit with 2 drawers and 2 pull-out storage drawers: 120 cm; mirror with lighting and shelf: 120 cm

Vanity unit with cast mineral basin and base unit with integrated LED lighting: 92cm; mirrored cabinet with 2 doors: 90cm; half height cabinet: 35cm; 2 shelves: 35 cm

LET THERE BE LIGHT

Exceptional look on the outside to allow a better look inside. The optional light strip between the top and the vanity unit is decorative as well as practical: it illuminates the drawer to perfection.

FIRST CLASS COMBINATION.

Sinea Selection stands for a well-balanced combination of design, functionality, pretty details and unusual finishes. We have made something already beautiful even more striking, for example by adding a curved shape to the cast mineral wash basin.

Cast in one piece, it now also shows off its glorious beauty in a matt finish. Here, the naturalness of the element water merges with the demands of contemporary bathroom furniture.

Vanity unit with double sized cast mineral basin: 141cm; base unit with 1 pull-out storage drawer and 2 drawers: 140 cm; mirror with lighting: 140cm.

WAVE-LIKE BEAUTY

The matt version of this cast mineral top vanity unit sets a new beauty benchmark. Flamboyant as well as natural.

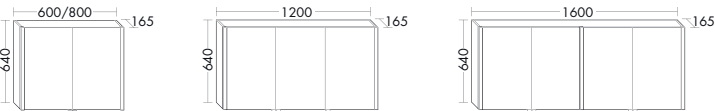

ALMOST INVISIBLE

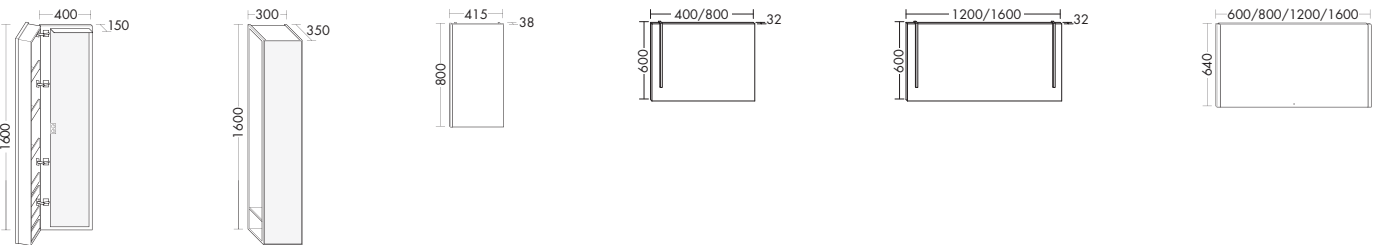

The new super slim joints ensure that the base unit follows the curved shape of the top even more closely.

Welcome to the details. On the following pages we present structured information which will help you with your individual planning. You are provided with an overview of all gloss paints and surface variations such as real wood, thermoform, acrylics and melamine available at burgbad. A technical representation of all furniture programmes with exactly dimensioned individual pieces of furniture is also included.

INSTALLATION SERVICE / WARRANTY & QUALITY

You have finished planning your bathroom? Then it's time to put your feet up.

You have decided on a range and can't wait to see it looking perfect in your home? Neither can we. That is why our qualified burgbad bathroom furniture fitters or approved qualified plumbers will come to your home to install your bathroom for you on the agreed date. Just place an order for this service with your bathroom retailer.

Then sit back and relax whilst our qualified fitters install your bathroom.

- They will check all existing connections, the electrics and the room situation.
- If necessary, they will plaster the walls or construct plasterboard walls for vanity units or mirrored cabinets.
- Once they have done all that, they will carefully install each element with the utmost precision.

- Once they have installed the furniture, they will connect the water inlets and outlets, carefully seal all joints and clean and polish the entire room to perfection.
- Our experts will of course also handle the disposal of all packaging materials for you.

All you have to do is to stand back in amazement as you realise that there is only one place that really shows off the quality of our furniture – your bathroom.

burgbad stands for outstanding quality. That's guaranteed.

5-year warranty

Starting from the date of the invoice, your burgbad bathroom furniture is covered by a 5-year warranty. To be able to make a claim under that warranty, the furniture must be installed by a qualified plumber or bathroom fitter, and your walls must be in good condition. This warranty does not apply to ex-display furniture, general wear and tear and accidentally or maliciously caused damages or damages caused through improper installation, use or negligence. It does not affect your statutory rights. Please refer to your warranty certificate for more information.

Ceramic: a material that meets the highest standards

Ceramic is a material which has been put to innumerable uses for millennia. At the burgbad factories, it meets 21st century technology. We use state-of-the-art methods to enhance the basic material's already excellent properties before we cast it in a wide range of different shapes and fire it at over 1,200 degrees. The result is a material that sets new benchmarks when it comes to durability, finish, colour fastness and stain resistance.

Cast mineral: inimitable look with perfect properties

Cast mineral is made from mineral fillers such as, for example, silica sand or rock dust and selected pigments. This material is so unusual because it feels pleasant to touch and can be turned into almost any shape, which makes it possible to manufacture made-to-measure in one piece without joints – precisely what is needed to ensure that our products meet our expectations when it comes to their aesthetics.

Finishes: exquisite workmanship down to the smallest detail

To manufacture our products, we use only timbers of the kind of quality that justly deserves the love we lavish on them. By way of outstanding craftsmanship you can see and feel.

For example our painted finishes: we apply 7 thin coats of premium quality gloss paint with excellent dispersion properties to achieve a perfect, smooth finish. The result is a non-porous, smooth finish that makes you want to keep on touching it. It reflects the light in a matte, perfect way that can only be achieved through a manufacturing process that is as labour-intensive as ours.

Lighting: perfect presentation

Bringing all aspects of sophisticated design and outstanding functionality to life calls for perfect illumination. burgbad's lighting concepts intend to please the eyes as well as the senses. Because good lighting enhances your way of life.

Especially when it is used in a way that takes the latest technological developments into account: innovative LED lighting for vanity units or mirrored cabinets provides illumination that is almost completely glare-free. Which results in greater colour fidelity, natural skin tones and a perfect presentation of colours and finishes.

Standards

We use only approved components that meet all CE Declaration of Conformity requirements for the electrical equipment we integrate in our furniture.

German Quality Assurance Association

We are members of the German Furniture Quality Assurance Association, an association of furniture manufacturers and suppliers. It awards its seal of approval to environmentally compatible quality furniture. Because furniture should not only be beautiful but also durable and not harmful to your health. All members of the German Furniture Quality Assurance Association agree to have their products tested by the independent furniture testing institute TÜV Dresden.

burgbad focuses on sustainable furniture

burgbad makes all of its wood product sourcing decisions on the basis of proof of origin from forests that are managed ecologically, economically and socially sustainable. We obtain all of our wood products from controlled sources. At least 70% of the wood-based raw materials we buy are PEFC certified. When a wood product bears the „PEFC“ label, there is no need to worry that the timber may have been harvested illegally or ruthlessly. The timber is guaranteed to have originated from forests that are managed sustainably in accordance with strict criteria and in harmony with nature – to ensure that they can still be enjoyed by future generations.
